Colorado's Health IT Roadmap

With input from over 1000 stakeholders, the Office of eHealth Innovation (OeHI) has developed *Colorado's Health IT Roadmap*, which provides a framework guiding Colorado's health IT efforts and accelerating technology-driven health care transformations.

Steered by the eHealth Commission, the *Roadmap* defines strategic initiatives aligned across public and private spheres to improve care coordination, data access, health care integration, payment reform and care delivery, ultimately advancing Colorado's Triple Aim - Best Care, Best Health, and Best Value.

Some of the *Roadmap's* key objectives include:

Care Coordination

Ensuring health-related information is easily accessible & usable within & across community services to provide effective coordination of care.

Governance & Policy

Aligning Colorado's policies, regulations, & investments to promote the secure sharing of health information.

Digital Health Innovation

Continuing to lead & adopt innovative technical approaches in support of Colorado's Triple Aim: Best Care, Best Health, & Best Value.

COLORADO

COLORADO

Background and Context

- 3+ years of convenings
- 60+ organizations
- Multiple environmental scans

The WHY

Wide range of stakeholders continue to be committed to SDoH resource and referral

Momentum with the health care system to address SDoH

Opportunity to align with the Commission's Health IT Roadmap

The USE Case

An interoperable and customizable infrastructure that allows multiple entities to screen and assess the SDoH needs of individuals and families, refer to non-medical resources, and confirm whether services are accessed

Colorado SDoH Resource and Referral Initiatives

Let's not forget our Community Partners

- As we build demand, we must build capacity
- Sustainability must include the community programs
