Care Coordination Workgroup

September 13, 2022
Virtual Only

Agenda

- ITN Updates
- PCCI - Leslie Wainwright
- Preview of coming workgroup meetings

ITN Updates

Surprise! It's an ITN now!

OeHI — Office of eHealth Innovation
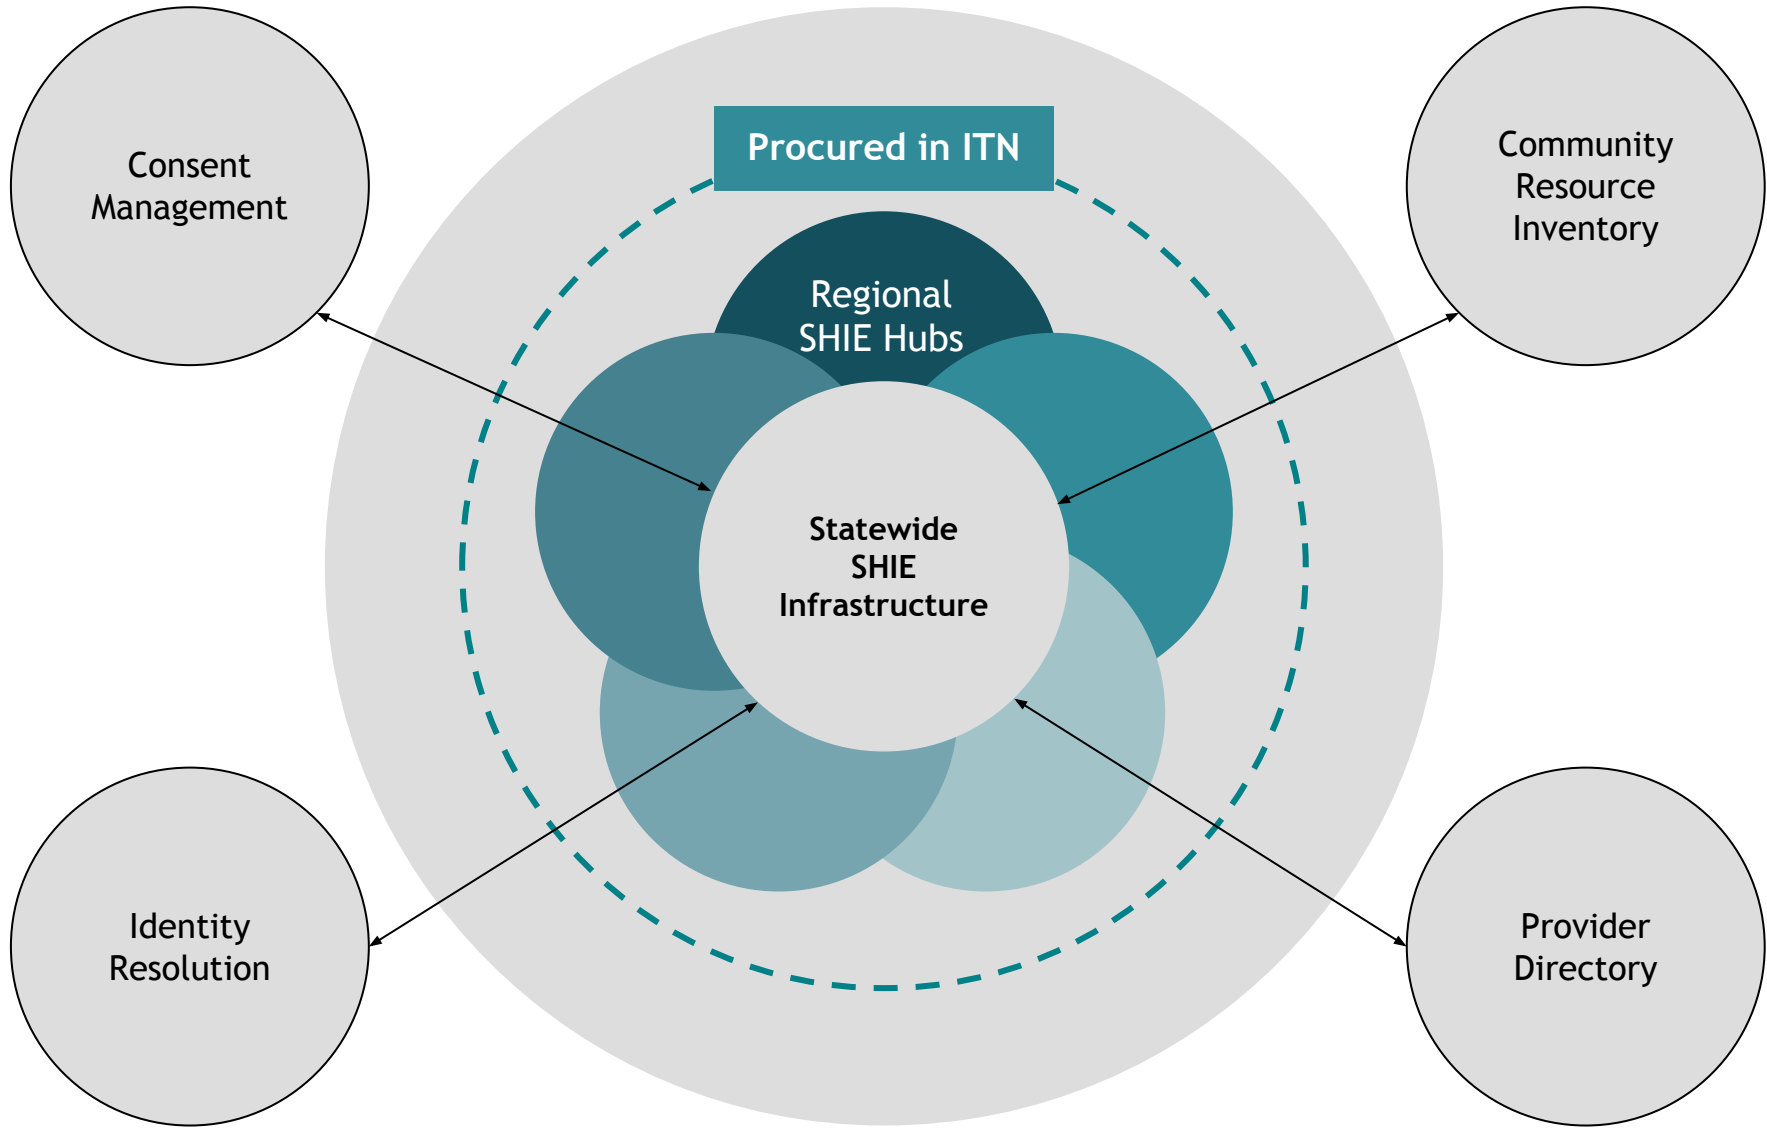

| RFP vs. ITN 101	
Request for Proposals (RFP)	**Invitation to Negotiate (ITN)**
Procurement for a **specific solution** with many technical requirements	Procurement to solve a **particular problem** with flexibility in how to implement
Mostly requirements, some expectations	Mostly expectations, some requirements
Front-loaded	Back-loaded
SOW/contract posted with the RFP	SOW/contract negotiated as a component of the ITN process

Why ITN?

- **Timeline:** ITN is back-loaded, allows us to get in CMS review queue and internal approvals process more quickly
- **Flexibility:**
  - RFP's typically have hundreds of specific technical requirements
  - Allows requirements to shift as needs evolve
  - Gives latitude for Offerors to provide creative solutions/proposals

SHIE ITN Progress and Next Steps

June - July	August	September	November	January 2023
Drafting	Internal Reviews	CMS Review	Open RFP Period	Evaluation & Award

We are here!

- **Current task: Internal HCPF review process**
- **Coming up:**
  - Internal review delayed by 2 weeks: Complete by 9/15
  - Still aiming for submission to CMS by 9/15
  - CMS funding request delayed: Aiming for submission by 9/12, response by 11/12

Strikeforce Updates

Strikeforce Updates

OeHI
Office of eHealth Innovation

Data Sharing Management: Resource Inventory

- Have talked to MHUW 2-1-1, Unite Us, findhelp, CCMCN, CRN, VNL, Google, Salesforce, Wellsky, 2-1-1 Collaborative, DRCOG, Hunger Free Colorado

Next Steps:
- OeHI to present at upcoming 2-1-1 Collaborative meeting
- Digging into data standards: HSDS, Open Eligibility, AIRS

Strikeforce Updates

Data Sharing Management: Provider Directory

- Have talked to HCPF MMIS/PEAK, CDPHE Health Systems Directory, BHA/OwnPath, SAMHSA, Google, DORA DOI

Next Steps:
- Google Solutioning Proposal: Very early stages of exploring use of Google Search algorithm and Google for Business to create "no wrong door"
- Crosswalking inventories of directories to understand overlap/shared data elements
