Office of Information Technology

eHealth Commission May 13, 2020

Agenda

- Project Intake & Governance
- Process & Roles
- Tools
- Objectives & Key Results
- Next Steps

Project Intake & Governance

Create a system to align & manage projects and initiatives

Drive Health IT Roadmap

Client centered care coordination

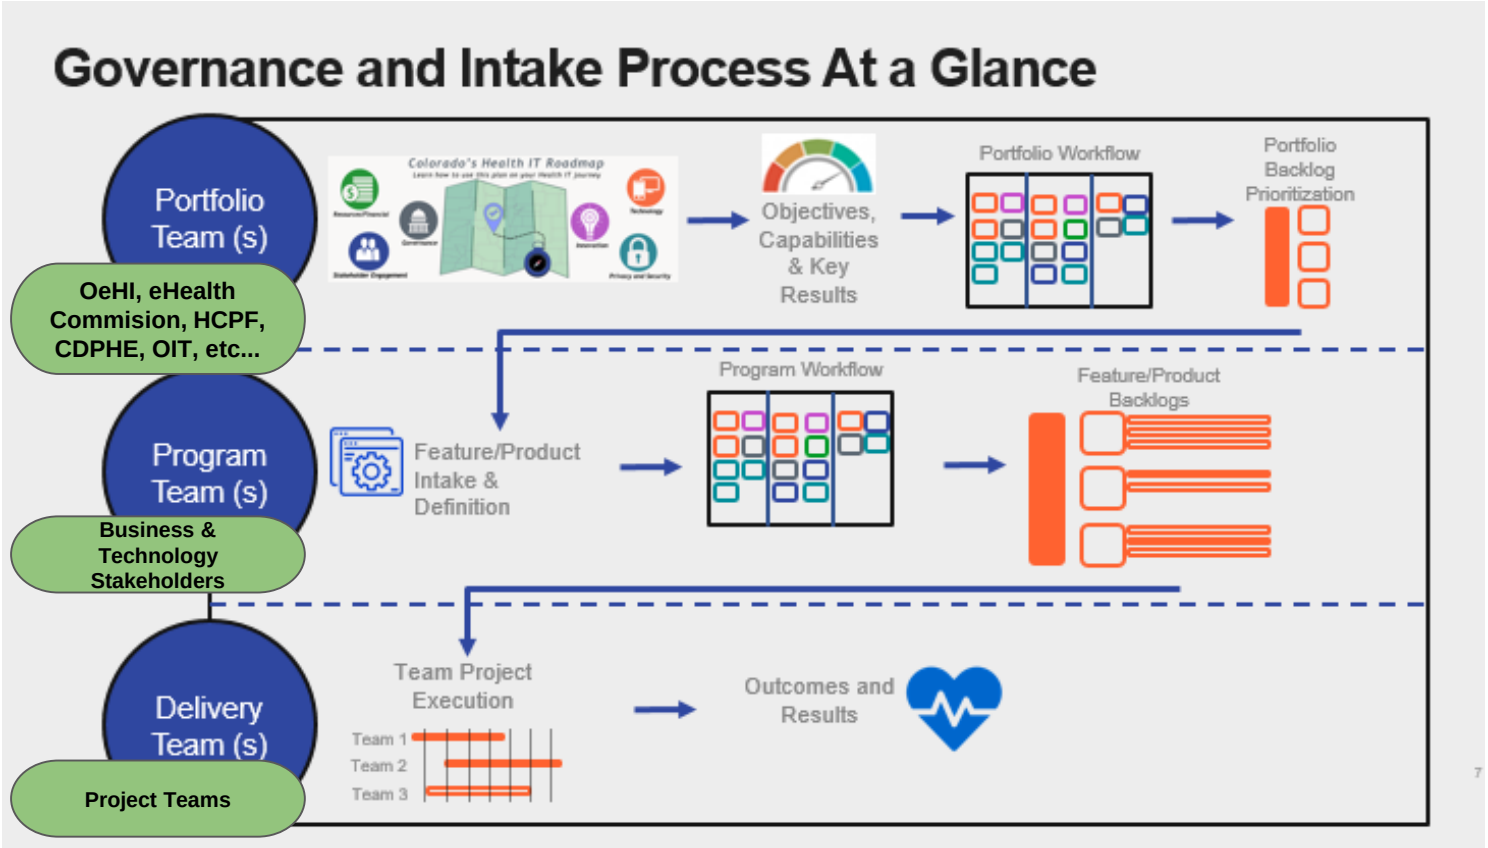
Alignment across state domain and providers

Expedite End to End Process

DELIVER VALUE

OeHI

Who Does What?



Objectives & Key Results

Anchor points

Prioritized Initiatives

Reduces Friction

Increases speed of decision-making

Approved eHealth Commission Funding Priorities

Priority 1-Financial Sustainability of HIE Infrastructure

Start ASAP

Health information exchange infrastructure is essential to supporting the health of Coloradans. During the pandemic, health providers and health systems may not be able to afford fees or may not be connected. Supporting providers (financially in need) to access and technical assistance w/ the HIE infrastructure is #1 priority.

Priority 2- Emergency Response Innovations

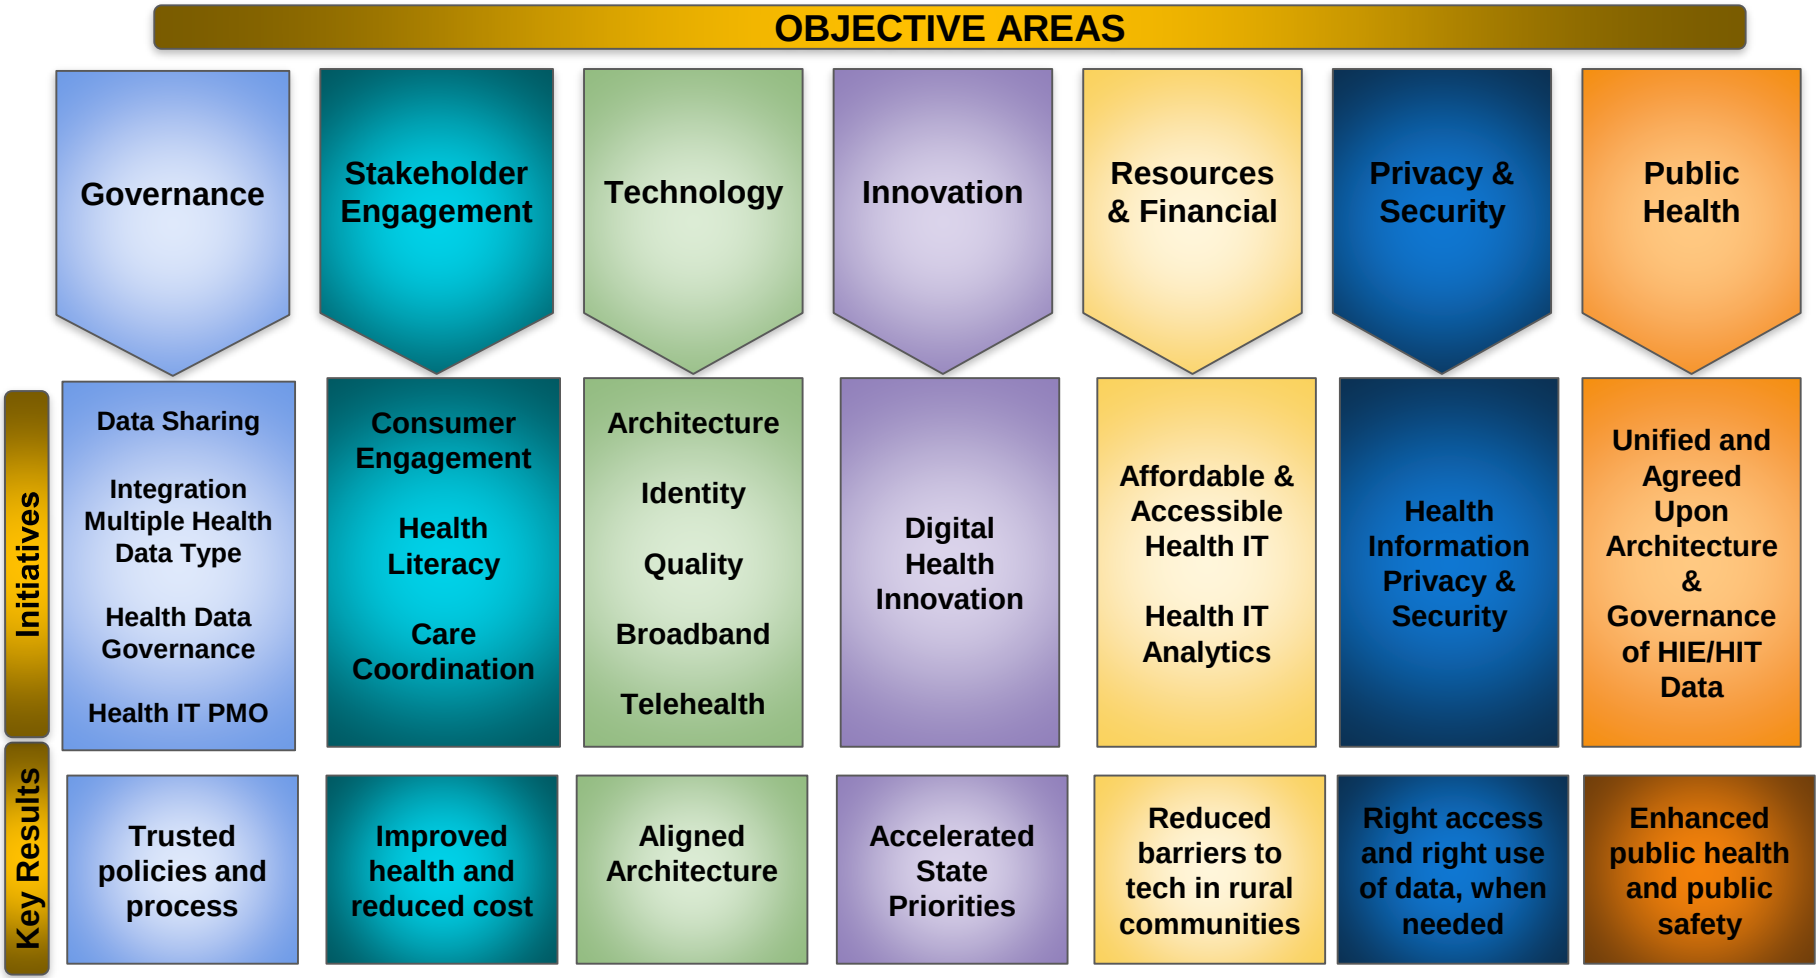
In Progress

To quickly respond to emergent needs, the Governor launched the innovation response team task force to accelerate screening, care coordination, telemedicine, and public health surveillance and reporting. New pilots and innovations are to be funded that support and align with this effort in the short term.

Priority 3- Advance HIE & Public Health Infrastructure

Start within 4-6 months

Longer term advancements are needed to HIE/HIT infrastructure that include expanding connectivity and availability of HIE data, refining infrastructure established through the emergency response for ongoing use, and providing ongoing technical assistance to adopt these advancements.



OBJECTIVE AREAS
Governance
Stakeholder Engagement
Technology
Innovation
Resources & Financial
Privacy & Security
Public Health
Initiatives
Data Sharing
Integration Multiple Health Data Type
Health Data Governance
Health IT PMO
Consumer Engagement
Health Literacy
