OeHI
Office of eHealth Innovation

December 22, 2016

Thank you, to all who participated in our Objectives Survey!
We value your input and participation in addressing Colorado's Health Information needs.

The Office of eHealth Innovation, Department of Health Care Policy and Financing, along with key stakeholders held workshops across the state to set strategies and outline objectives in order to accomplish Colorado's Triple Aim. The 14 objectives outlined will be the focus of the intiviatives developed for the Colorado Health IT Roadmap.

In November, the team at OeHI released a survey in order to obtain input from stakeholders across the state. 850 individuals responded to the survey distribution. Of those 850 respondents:

- 376 respondents requested to be kept informed or volunteered to participate in the project.
- 208 respondents provided comments.
- 47 of the 64 counties within Colorado were represented.
- 24 Colorado Organizations assisted in the survey distribution.

A special THANK YOU to the following organizations:

Colorado Health IT Objectives Survey

The following objectives are listed in relative order of importance:

- **Care Coordination**: Health care and health-related information needed for effective coordination of care across community services is easily accessible and usable throughout Colorado.
- **Access to Information**: Coloradans (and their authorized individuals and providers) can easily, appropriately, and securely access health care and health-related information.
- **Data Integration and Availability**: Physical health, behavioral health, social services, payment, and cost information is integrated and readily available and usable.
- **Cost of Health IT**: All providers have access to cost effective, health IT support and services that are aligned and realistic with their budgets and the value proposition of those services is clear and transparent.
- **Quality Reporting**: State required quality measures are relevant to achieving Colorado's State of Health Triple Aim - Best Health, Best Care, and Best Value - and they are aligned across programs and settings, standardized, and easy to report.
- **Broadband**: High speed, reliable broadband is available throughout Colorado to support Colorado's State of Health Triple Aim – Best Health, Best Care, and Best Value.
- **Governance & Policy**: Colorado's policies, regulations, and investments are aligned to promote the secure sharing of health information required to achieve Colorado's State of Health Triple Aim – Best Health, Best Care, and Best Value.
- **Analytics**: There is widespread access to, and use of, health data analytics.
- **Data Governance**: There is consistent, broad, open, and transparent governance of health care and health-related data, and the sharing of that data.
- **Telehealth**: The use of telehealth is a routine, secure, viable point-of-care choice.

- **Innovation**: Colorado is a recognized leader in supporting and adopting innovative technical approaches and solutions in support of Colorado's Triple Aim.
- **Governance & Policy**: There is an agreed upon approach for uniquely identifying participants (e.g. providers, patients, payers, persons) in Colorado's health care ecosystem.
- **Consent Management**: Coloradans have easy to use, clear and concise pathways to manage (to the extent allowed by law) their individual consent to the sharing of their health care information.
- **Governance & Policy**: Health care information privacy policies and regulations are consistently understood and consistently applied across Colorado's health care ecosystem.

Each of the 14 objectives answer the question, "If we successfully execute the Health IT Roadmap, what will we have accomplished?"

Where does this put us on our Roadmap?

Now that we have defined the objectives, we will be able to focus on continuing our efforts in 2017. In January and February, OeHI, HCPF, along with key stakeholders will conduct two workshops as part of the Roadmap development process. The workshops will identity the following:

- **Capabilities workshop**: To identify what functional capabilities must be present in order to achieve the 14 objectives.
- **Enablers Workshop:** To identify technology, process, policies and other elements that need to be in place in order to support the capabilities.
