The SHIE Bulletin

Working Together Towards
Whole Person Health

September 2023

Issue 1. Vol. 3

The Wait Is Over!

Last month we illustrated the journeys of Adrian and Vanessa, two fictional people in Colorado who are accessing coordinated care services through Social Health Information Exchange (SHIE). This month we are providing long-awaited updates about our SHIE Invitation to Negotiate (ITN)!

Drumroll, Please...

The wait is over! After many months of negotiations for our SHIE ITN, our Intent to Award is posted! We are excited to partner with [Resultant](#) to develop a scalable, adaptable, and sustainable statewide SHIE architecture.

Resultant is a people-first technology consulting company with a long history of collaborating with state agencies to deliver large, complex data solutions.

SHIE ITN
Intent to Award:
Resultant

Work will begin on this contract following federal approval. More details coming soon!

We look forward to continuing great partnerships to improve whole-person health across Colorado!

NEW RESOURCE:

SHIE ITN Overview Video

In Case You Missed It:

Our team presented SHIE ITN updates at the September 13 eHealth Commission Meeting!

In case you missed it or just want to re-watch, check out the recording of the meeting on the OeHI YouTube page. The SHIE updates start at 48:27!

As always, if you have questions about SHIE, please email gov_ask_oehi@state.co.us!

Social Determinants of Health (SDoH) Service Provider Request for Information (RFI) - Launching September 29!

We are excited to share that OeHI is reopening our [SDoH Service Provider RFI](#), which will be open through **October 31**.

This is an open opportunity for technology vendors providing SDoH services in Colorado to share information about their available products and services to organizations who may be delivering or referring clients to SDoH supports. The information from this RFI will be added to OeHI's [SDoH Vendor Guide](#), a publicly available resource aimed at promoting transparency and helping potential clients view services in one place. Information about how to provide information for this RFI will be available on [VSS](#) later this week.

Examples of eligible vendor services include but are not limited to: Connection to Statewide Health/Social Information Networks, Outcome Tracking, Screening Tools, Social Needs Scores, Technical Support, Closed-loop Referrals, and SDoH Data Sets. Community-based organizations do not need to submit a response.

If your organization previously submitted information for the [SDoH Vendor Guide](#), you do not need to fill out this form again. If you would like to update the information that was previously submitted and currently displayed in the [Guide](#), please email your requested changes to gov_ask_oehi@state.co.us.

Please note that this posting is not a traditional RFI, formally defined and managed within the VSS system. This posting is not in connection with the Department of Health Care Policy and Financing (HCPF) or the State of Colorado Price Agreement List (NASPO) but rather is meant to be a publicly available resource for informational purposes only. This posting will be open semi-annually.

[This form is not in any way related to the Invitation to Negotiate for the Social Health Information Exchange or any other active procurements by the State of Colorado.](#)
