## Overview

---

### Colorado as the Healthiest State

"Our **GOAL** is for Colorado to become the healthiest state in the nation."

"Our **VISION** is a future where health and well-being are as much a part of Colorado's way of life as our mountains, clear skies, and pristine environment."

### Colorado's Triple Aim

Best Health, Best Care, Best Value

*The above are excerpts from  
"The State of Health, Colorado's Commitment to Become the Healthiest State"  
Office of Governor John Hickenlooper  
April 2013*

In September of 2016, a series of workshops were held around the state to understand the wants and needs of individuals working with health information on a daily basis. Clinicians and team members, representatives of insurance firms, representatives of State agencies and departments, community-based organizations, and individuals all participated.

Based on those workshops, input from the project Steering Committee, review of Colorado documents, individual stakeholder interviews, and our consultants', Mosaica Partners, knowledge of the HIT/HIE environment a list of 14 objectives was developed by the project team for the Colorado Health IT Roadmap.

The project team believes that each of the 14 objectives are relevant, appropriate, important, and able to be accomplished - or demonstrate significant progress - within the next 3 - 6 years.

Subsequently, to gain broadest possible stakeholder input, a statewide survey was conducted to understand the relative importance of the objectives.

## Colorado's Health IT Roadmap - Objectives Survey Results

### Survey Design & Distribution

The purpose of the survey was to obtain input from across a broad range of Colorado health care stakeholders on their perspective of the relative importance of the 14 objectives that had been developed.

The survey was distributed to a broad spectrum of stakeholders in the health care community. The Colorado Office eHealth Innovation (OeHI) distributed the survey with the assistance of 24 organizations. Over 850 individuals, representing 47 of Colorado's 64 counties, responded to the survey.

We'd like to thank the following organizations for distributing the survey:

Aspen Valley Hospital	CORHIO
Banner Health	HCPF
Center for Improving Value in Health Care	Mental Health Center of Denver
Children's Hospital Colorado	Mesa County Physicians IPA
Colorado Department of Human Services	North Range Behavioral Health
Colorado Department of Public Health	OeHI Website/Newsletter
Colorado Health Foundation	Office of Information Technology - UC
Colorado Health Institute	PDMP Consortium
Colorado HIT Workgroup	PRIME Health
Colorado Hospital Association	Quality Health Network
Colorado Rural Health Center	Rocky Mountain Health Plans
Colorado Telehealth Network	University of Colorado Denver

**Colorado's Health IT Roadmap - Objectives Survey Results**

**Summary of Objectives Ranking Results**

Question #4 asked respondents to choose five of the objectives that are most important, and should be addressed first – near term, four objectives that are of medium importance, and five objectives that are less important and could be addressed later.

Based on the responses, the 14 objectives were ranked as shown in the chart below, with Rank 1 being most important.

1	Care Coordination: Health care and health-related information needed for effective coordination of care across community services is easily accessible and usable throughout Colorado.
2	Access to Information: Coloradans (and their authorized individuals and providers) can easily, appropriately, and securely access health care and health-related information.
3	Data Integration and Availability: Physical health, behavioral health, social services, payment, and cost information is integrated and readily available and usable.
4	Cost of Health IT: All providers have access to cost effective, health IT support and services that are aligned and realistic with their budgets and the value proposition of those services is clear and transparent.
5	Quality Reporting: State required quality measures are relevant to achieving Colorado’s State of Health Triple Aim - Best Health, Best Care, and Best Value - and they are aligned across programs and settings, standardized, and easy to report.
6	Broadband: High speed, reliable broadband is available throughout Colorado to support Colorado’s State of Health Triple Aim – Best Health, Best Care, and Best Value.
7	Governance & Policy: Colorado's policies, regulations, and investments are aligned to promote the secure sharing of health information required to achieve Colorado’s State of Health Triple Aim – Best Health, Best Care, and Best Value.
8	Analytics: There is widespread access to, and use of, health data analytics.
9	Data Governance: There is consistent, broad, open, and transparent governance of health care and health-related data, and the sharing of that data.
10	Telehealth: The use of telehealth is a routine, secure, viable point-of-care choice.
11	Innovation: Colorado is a recognized leader in supporting and adopting innovative technical approaches and solutions in support of Colorado's Triple Aim.
12	Governance & Policy: There is an agreed upon approach for uniquely identifying participants (e.g. providers, patients, payers, persons) in Colorado’s health care ecosystem.
13	Consent Management: Coloradans have easy to use, clear and concise pathways to manage (to the extent allowed by law) their individual consent to the sharing of their health care information.
14	Governance & Policy: Health care information privacy policies and regulations are consistently understood and consistently applied across Colorado’s health care ecosystem.
