eHealth Commission Asks

Each eHealth Commission Workgroup has provided one or more questions for consideration from the eHealth Commission. Please review the questions, or “asks” below.

Care Coordination

- To advance the Care Coordination Initiative, OeHI will be establishing three new task forces focused on developing a grant application, increasing communications and community engagement, and financial sustainability. We are hoping to recruit key stakeholders with expertise and/or interest in each of these areas. If you have recommendations of individuals we should reach out to or communication networks we may be able to utilize to spread the word please email Cara – cara.bradbury@state.co.us

Identity Resolution

- How do we connect efforts to providers? Ex. LEAP, WIC data to providers.

Provider Directory

- Can the group provide use cases for the CDPHE provider directory outside of HIEs?

Consumer Engagement

- Can we coordinate a special input session with the Commission on consumer needs, ideals, and uncovering intersections with the other Roadmap initiatives? Gary Drews is happy to host if we can coordinate schedules.
- RFI is slated to be released to the public mid-January - we could use the Commission's help in distributing far and wide. Details to come via email mid-month.

Telehealth/Broadband

- What are some key components/criteria/consideration you would hope to see included in a roadmap for a statewide telehealth infrastructure?
- From an impact and data driven perspective, which populations/patients/members do you believe the plan should focus on as a first priority?

Consent Management

- Where should OeHI focus projects and funding in 2019/2020 to accelerate this planning effort?
